

I respectfully request that the FCC DOES NOT weaken the stringent regulations set forth by the state of New Jersey, regarding the do not call list. I personally wish that if the FCC is not happy due to NJ's rules being stricter than that of the FCC, then the FCC should then adopt the regulations which NJ has in place. I neither have the patience nor time to deal with these type of unsolicited phone calls to either my office, home or cell phone. If you want to get down to the "brass tacks", it is a violation of my personal and private rights, and it is the FCC's job to protect our rights as citizens, in this situation.
